CONTENTS

1. Complex Numbers, Demoivre's Theorem and Deductions

- De-Moivre's Theorem
- Illustrative Examples
- Exercise
- Answers
- The q roots of $(\cos\theta + i \sin\theta)^{p/q}$
- Illustrative Examples
- Exercise
- Answers
- Expansion of $\sin n\theta$ and $\cos n\theta$:
- Expansion of $\tan n\theta$
- Illustrative Examples
- Exercise
- Answers
- Expansion of $\tan(\alpha + \beta + \gamma + \delta + \ldots)$
- Expansion of $\sin\alpha$ and $\cos\alpha$ in series of power of α
- Expansion of $\tan\alpha$ in power of α
- Illustrative Examples
- Exercise

2. Hyperbolic Functions

- Definitions
- Euler's Exponential Values
- Periodicity of e^z
- Hyperbolic Functions
- Relations between Hyperbolic and Circular Functions

- Formulae for Hyperbolic Functions
- Expansions for sinh x and cosh x
- Periods of Hyperbolic Functions
- Separation into Real and Imaginary Parts
- Illustrative Examples
- Exercise
- Answers
- Objective Questions
- Answers

3. Inverse Hyperbolic Functions

- Inverse Circular Functions of Complex Quantities
- Inverse Hyperbolic Functions
- Relation between Inverse Hyperbolic and inverse circular functions
- Inverse hyperboic functions of complex quantities
- Illustrative Examples
- Exercise
- Answers
- Objective Questions
- Answers

4. Logarithms of Complex Quantities

- Logarithm of Complex Quantities
- To separate $\log_e (x + i\,y)$ and $\log_e (x + i\,y)$ into real and imaginary parts
- Some Important Results
- Illustrative Examples
- Exercise
- Value of a^z where a and z are complex quantities
- Separation of $(a + i\,b)^{x+i\,y}$ into real and imaginary parts
- Illustrative Examples
- Exercise
- Objective Questions
- Answers

5. Trigonometrical Expansions

- Illustrative Examples
- Exercise
- Answers

6. Gregory's Series

- Generalised form of Gregory's Series
- Applications of Gregory's Series
- Illustrative Examples
- Exercise
- Objective Questions
- Answers

7. Summation of Series

- C+ iS Method
- Summation depending upon Geometric Progression (Angles in Arithmetical Progression)
- Illustrative Examples
- Exercise
- Answers
- Summation depending on Airthmetic Geometric Series
- Exercise
- Answers
- Summation depending upon Bionomial Series
- Illustrative Examples
- Exercise
- Answers
- Summation depending upon Exponential series:
- Illustrative Examples
- Exercise
- Answers
- Summation depending upon Logarithmic Series:
- Illustrative Examples
- Exercise
- Answers
- Summation depending upon Gregory's series:
- Illustrative Examples

- Exercise
- Answers
- The Method of Difference :
- Illustrative Examples
- Exercise
- Answers
- Miscellaneous Examples on Difference Method :
- Illustrative Examples
- Exercise
- Answers
- Objective Questions
- Answers

8. INFINITE PRODUCTS

- Resolution of sin θ as infinite products
- Resolution of cos θ as infinite products
- Factors of sinh θ and cosh θ
- Illustrative Examples
- Exercise
