

# CONTENTS

## 1. SYSTEM OF COORDINATES

- Introduction
- Definitions
- Co-ordinates of a point in space
- Alternative explanation
- Section formula
- Cylindrical Coordinates
- Illustration
- Exercise

## 2. DIRECTION COSINES AND PROJECTIONS

- Angle between two lines
- Direction cosines of a line
- Position of a point
- Relation between direction cosines
- Direction-ratios
- Projection of a Segment
- Distance of a point from a line
- Illustrative Example
- Exercise

## 3. THE PLANE

- Definition
- General equation of first degree
- Various forms of Equation of the plane
- Position of a point with respect to a Plane
- Projections on a plane

- Theorem
- Illustrative Example
- Exercise

#### 4. THE STRAIGHT LINE

- General Equation of a Straight Line
- Symmetrical form of the Equation of a Straight Line
- Line through Two Points
- Angle between a Line and a Plane
- Conditions for a line to lie in a plane
- The Line of Greatest Slope
- Colannar Lines
- Perpendicular distance of a point from a Line
- The image of a point in a plane
- Line Intersecting two Lines
- Shortest distance between two lines
- Intersection of three Planes
- Volume of Tetrahedron
- Equation two skew lines in simplest form
- Illustrative Example
- Exercise

#### 5. THE SPHERE

- Definition
- Equation to a Sphere
- Radius and Centre
- Sphere through four given points
- Plane section of a sphere
- Great Circle
- Intersection of two spheres
- Equation of a circle
- Intersection of a line and a sphere
- Power of a point
- Equation of the tangent plane at a point
- Condition of tangency
- Polar Plane
- Equation of Polar Plane
- Pole of a plane

- Propositions on poles and polars
- Angle of intersection of two sphere
- Orthogonal spheres
- Condition of orthogonality of two spheres
- Radical Plane
- Radical line or Radical axis
- Radical Centre
- Co-axal spheres
- Limiting points of a co-axal system
- Illustrative Examples
- Exercise

## 6. THE CONE

- The Cone
- Theorem
- Number of arbitrary constants in the equation of a cone
- Cone with given vertex and given conic for base
- Working Rule
- Cone and a plane through its vertex
- Cor. Condition of Perpendicularity
- Three mutually perpendicular Generators
- Tangent Plane
- Reciprocal Cone
- Right Circular Cone
- Equation of right Circular Cone
- Enveloping Cone
- Equation of the enveloping cone of a sphere
- Illustrative Examples
- Exercise

## 7. THE CYLINDER

- The Cylinder
- Equation of a Cylinder
- Enveloping Cylinder
- Right Circular Cylinder
- Illustrative Examples
- Exercise

## 8. THE CONICOIDS

- The Conicoids
- Central Conicoids
- Intersection of a line and a Conicoids
- Director Sphere
- Normals to a Conicoids
- Plane of Contact
- Polar plane of a point
- Conjugate points and Conjugate planes
- Polar Lines
- Conjugate Lines
- Diameter and Diametral plane of a Central Conicoids
- Conjugate diameters and conjugate diametral planes of an ellipsoid
- Relations between the extremities of the Conjugate Diameters
- Properties of Conjugate Semi-diameters
- Paraboloids
- Intersection of a line with a paraboloid
- Illustrative Examples
- Exercise

## 9. PLANE SECTIONS OF GENERAL CONICOIDS

- Plane Section of a Central Conicoid
- Areas of Central Plane Sections
- Length and direction-ratios of the axes of non-central Plane Section of a Central Conicoid
- Area of any Plane Section
- Circular Sections
- Nature of a given Section of a Paraboloid
- Umbilics
- Illustrative Examples
- Exercise

## 10. GENERATING LINES OF CONICOIDS

- Ruled Surfaces
- Condition for a line to be a generator of the Conicoid

- Projection of the Generators of a Hyperboloid on any principal plane
- Perpendicular Generators
- Generating Lines of a Hyperbolic Paraboloid
- Properties of Generating line of Hyperbolic Paraboloid
- Illustrative Examples
- Exercise

### **11. CONFOCAL CONICOIDS**

- Confocal Conicoids
- Confocals through a given point
- Elliptic Coordinates
- Confocals through a point on a Conicoid
- Locus of poles of a plane with respect to Confocals
- Equation to the Enveloping Cone
- Corresponding Point
- Focus and Directrix
- Illustrative Examples

### **12. REDUCTION OF GENERAL EQUATION OF SECOND DEGREE**

- The General Equation of Second Degree is
- Illustrative Examples
- Exercise

### **APPENDIX**
