

CONTENTS

Unit I Algebra

1. Polynomial
2. Polynomial Equation
3. Quadratic Equation
 - Solution of Quadratic Equation
 - Methods of Solving a Quadratic Equation
 - (i) Method of Factorization
 - (ii) Method of Completion of Square
 - (iii) Formula Method
4. Equations Reducible to Quadratics
 - Exercise
5. Determinant
6. Properties of Determinant
7. Cremer's Rule
 - Exercise
8. Matrix
 - Types of Matrices
 - (i) Row Matrix
 - (ii) Square Matrix
 - (iii) Diagonal Matrix
 - Identity Matrix or Unit Matrix
 - Null Matrix
 - Transposed Matrix
 - Properties of Matrix
 - Equality of Matrices
 - Addition of Matrices
 - Properties of Matrix Addition
 - Subtraction of Matrices
 - Scalar Multiple of a Matrix
 - Multiplication of Matrices
9. Properties of Matrix Multiplication
 - Adjoint Matrix
 - Inverse of a matrix
 - Solution of Simultaneous Linear Equations
10. Exercise

Unit II Measures of Central Tendency

1. Arithmetic Mean (or mean)
2. Weighted Arithmetic Mean
3. Combined Mean
4. Arithmetic Mean of Grouped Data
 - Short Cut Method
 - Step Deviation Method
5. Geometric Mean
6. Harmonic Mean
7. Generalised Definition of Geometric and Harmonic Means
8. Median
9. Mode
10. Exercise

Unit III Trigonometry Measurement of Angles

1. Degrees
2. Radians
 - A Constant Number π
 - Relation Between an arc and an Angle
 - Trigonometrical Ratios
 - Signs of Trigonometrical Ratios
 - Trigonometrical Ratio's of Related Angles
3. The Values of Trigonometrical Ratio's of Some Important Angles
4. Trigonometrical Ratio's of Compound Angles
5. Formulae Involving double Angles
6. Formulae Involving Triple Angles
7. Formulae For Changing Sum Or Difference Into Products
8. Exercise

Unit IX Analytical Plane Geometry

1. Distance formula
2. Locus of a Point
3. Exercise

Unit V Calculus

1. Functions
2. Function as a Mapping
3. Limit of a Function
4. Right Hand and Left Hand Limits
5. Indeterminate Form
6. L'Hospital's Rule
7. Some Important Expansions
8. Some Important Limits
Exercise
9. Differentiation
10. Differential Coefficient of $\log x$
11. Differential Coefficient of e^x
12. Differential Coefficient of Constant K
13. Differential Coefficient of $\sin x$
14. Differential Coefficient of $\cos x$
15. Differential Coefficient of $\tan x$
16. Differential Coefficient of $\cot x$
17. Differential Coefficient of $\sec x$
18. Differential Coefficient of $\operatorname{cosec} x$
19. Rules of Differentiation
20. Differentiation of Inverse Circular Functions
21. Logarithmic Differentiation
22. Differentiation of Implicit Function
23. Differentiation of Parametric Equations
24. Successive Differentiation
Exercise
25. Integration
26. Some Standard Formulae of Integration

27. General Properties of Integration
28. Integration by Parts
29. Integration by Substitution
30. Some Special Integrals
31. Integration by Partial Fraction
32. Some Important Integrals
33. Definite Integral
34. General Properties of Definite Integrals
35. Exercise

Unit VI **Differential Equation**

1. Differential Equation of First Order & First Degree
2. Differential Equation
 - Order and Degree of a Differential Equation
 - Solution of Differential Equation
 - General Solution
 - Particular Solution
 - Formation of Differential Equation
 - Differential Equation of First Order and First Degree
 - (i) Variables Separable
 - Homogeneous Equations
 - Equations Reducible to Homogeneous Form
 - Linear Differential Equation
3. Working Rule
4. Equation Reducible to Linear Form
 - Exercise
5. Linear Differential Equation with Constant Coefficients
 - Particular Integral
 - Exercise
6. Simultaneous Linear Differential Equation
7. Exercise

Unit VII Biometrics

1. Significant Digits
2. Rounding of Numbers
3. Collection of Data
 - Complete Enumeration (or Census)
 - Sample Survey
3. Sampling
 - Law of Statistical Regularity
 - Law of Inertia of Large Numbers
4. Different Methods of Sampling
 - Random Sampling (or Probability Sampling)
 - Stratified Random Sampling
 - Systematic Sampling (or Quasi-Random Sampling)
 - Multi-Stage Sampling
5. Non Random Sampling Methods
 - Purposive Sampling (or Judgement Sampling)
 - Quota Sampling
 - Cluster Sampling (or Block Sampling)
6. Sample
7. Sample Size
8. Data Organization
9. Diagrammatic Representation of Data
 - One Dimensional Diagrams
 - (i) Line Diagram
 - (ii) Simple Bar Diagram
 - (iii) Multiple Bar Diagram
 - (iv) Sub-Divided or Component Bar Diagram
 - (v) Percentage sub Divided Bar Diagram
 - (vi) Deviation Bar Diagram
 - (vii) DUO- Directional Bar Diagram
 - (viii) Sliding Bar Diagram
 - (ix) Pyramid Diagram
 - (x) Broken Scale for Diagram
10. Two Dimensional Diagram
 - Rectangular Diagrams

Square Diagrams

Circular or Pie Diagrams

11. Pie- Diagram

12. Three Dimensional Diagram

Exercise

13. Measures of Dispersion

14. Absolute Measures

15. Relative Measures

16. Range

Quartile Deviation (or semi inter quartile range)

17. Mean Deviation

Coefficient of Mean Dispersion

18. Standard Deviation

19. Variance

20. Calculation of S. D. (σ)

21. Relative Measure of Dispersion

22. Coefficient of Variation

23. Coefficient of Quartile Deviation

Coefficient of Mean Deviation

Standard Error of Means

Fiducial Limits (or Confidential limits)

24. Probability

Definition of Probability

Sample Space

Exhaustive Event

Random Experiment

Trial

Event

Equally Likely Event

Independent Events

Mutually Exclusive Event

Impossible Event

Complementary Event

Compound Event

Addition Theorem of Probabilities

Proof

Conditional Probability

BayE's Theorem

Proof

Exercise

25. Binomial Distribution

26. Properties of Binomial Distribution

27. Poisson Distribution

28. Properties of Poisson Distribution

29. Standard normal Distribution

Properties of Normal Distribution

Exercise

30. Moments

31. Skewness

32. Kurtosis

Exercise

33. Correlation

Correlation Coefficient by Covariance or Karl

Pearson's Method

Step Deviation Method

34. Regression

Method of Least Square and Curve Fitting

Working Procedure of Curve Fitting

Exercise

Statistical Inference

Test of Hypothesis

One Tailed and Two Tailed Tests

Errors of Sampling:

(i) Type I Error

(ii) Type II Error

Level of Significance

Critical Region

Acceptance Region

Critical Values

Power of a Test

Procedure For Testing of Hypothesis

Student's 't' Test

Properties of t-Distribution

Parameter & Statistics

Large & Small Sample

Degree of Freedom

Test for Specified Mean

Test of Equality of Two Means

Paired t -Test for Difference of Means

35. F-Test

36. F- Distribution

37. CHI-Square Variates

Exercise

38. Analysis of Variance (or ANOVA)

39. The technique of analysis of Variance

One Way Classification

Short Cut Method

40. Coding Method
