MODULE 1: INTRODUCTION

1. Infrastructure and Economic Development

Introduction; History of the term infrastructure; Infrastructure in the developing world; "Hard" versus "soft" infrastructure; Types of soft infrastructure; Economic infrastructure; Social infrastructure; Cultural, sports and recreational infrastructure; Institutional Mechanism for Infrastructure Development; Infrastructure and Growth; The Changing Role of Infrastructure; The Economics of Infrastructure in a Globalized World; The Returns to Infrastructure (Infrastructure and Development); The Role of the Private Sector; Political Economy Considerations of Infrastructure Provision; Conclusion; Exercise

2. Marginal Cost Pricing Vs Other Methods of Pricing in Public Utilities

Marginal Cost; Economies of scale; Perfectly competitive supply curve; Decisions taken based on marginal costs; Relationship to fixed costs; Externalities; Social costs; The Marginal Cost Rule; The Multi-part Tariff and the 'Club'; Income redistribution and the 'club' principle; 'Voluntary' choice and the 'Club' principle; The Welfare Model and Uncertainty; Social Cost Benefit Analysis for Project Appraisal; Summary; Conclusions; Exercise.

3. Development of Public Systems in India

Development of Public Systems in India; Monitoring of Public Systems; Management of Public Systems; Resources for Public Systems; Public System—A Service Provider; Comparison of Management Function of Public System, Public Sector, Corporate Sector and Private Sector; Social Cost Benefit Analysis; Exercise

MODULE 2: TRANSPORT ECONOMICS

4. Subsidization

Introduction; Types of subsidies; Categorising subsidies; Perverse subsidies; Examples; Price Structures, Cross-Subsidies, and Competition in Infrastructure; Challenges in Private Structure Infrastructure Projects; Equality & Efficiency; Exercise

5. Transport Economics

Introduction; Transport Systems; Demand Curve; Demand and Budgets in Transportation; The Shape of Demand; Supply Curve; Supply and Demand Equilibrium; Externalities; Traffic congestion; Tradable mobility credits; Funding and financing; Regulation and competition; Transport Economics; Effect of Change in Fuel Price on Transport; Project appraisal and evaluation; Social effects on poverty; Car taxation; Provision; Cost and Benefit Concepts; Exercise

MODULE 3: COMMUNICATIONS

6. Communications—Posts and Telegraphs

Utility Ratemaking; Overview; Ratemaking Goals; Postal System; Indian Postal Service; Postal Services; Financial Services; Telecommunications; Growth of Postal Services; Socio Economic Issues of Postal Services; Growth and Economics of Telecommunication Sector; Future of Posts and Telegraphs; Exercise.

MODULE 4: ENERGY ECONOMICS

7. Energy It's Role in Economic Development

Introduction; Economy and Energy; Types of Economic System; **Past and Present World Energy Consumption Pattern; Primary Energy; By Country; Past and Present World Energy Supply Patterns; World Energy and Population Trends to 2100; Price Developments: Pre and Post OPEC; Economics; Oil Price History and Analysis; Recent Energy Policy Problems; Exercise**

8. Energy Conservation

Introduction; History; Energy Efficiency Trends in the United States; Conservation of Energy; The Feasibility of Conservation: Energy/GNP Evidence; Energy Intensity; The Rationale for Energy Conservation; Methods of Achieving Energy Conservation; Energy Conservation on the Supply Side: Conservation in Production; Conservation Acts; Conservation Laws of the USA; Legal Framework for Energy

Conservation of The Government of India; Enactment of Energy Conservation Act - 2001; Important Milestones of EC Act; Conclusion; Exercise

9. Renewable and Non-Conventional Sources of Energy

Classification of Energy Sources; Characteristics of Energy; Gas Hydrates; Exercise

10. The Relationship Between Energy use and the Economy

Introduction; Energy Policy and the Economy; The Direct Impact of Rising of Energy Prices; The Indirect Impact of Rising Energy Prices; The Implications for Economic Policy; The Implications for Energy Policy; The Relationship Between Energy use and Economy; Supply Solutions to the Energy Problem; Vicious Circles of Energy Problem; Aggregate Demand for Energy; Oil Substitution; Exercise

11. Energy Modeling and Strategies

Introduction; Role of Analysis in Policy Making–Validation; Application of Energy Models; Overview of Energy Modeling; Conclusion; Exercise

CASE STUDIES 1

Economy and Energy Policy of India

Introduction; Overview; History; Sectors; Economic Trends and Issues; Energy Policy of India; Electricity Sector in India; Exercise

CASE STUDIES 2

Need for Change in Government Policy during Commercialization of Biomass Power Plants

Introduction; Promotion of green technologies and the creation of rents; Risks of government failure; Rent Management; Rice Husk as Fuel; Properties of Rice Husk and Rice Straw; Characteristics of rice husk and RHA; Utilization of rice husk and rice husk ash; Availability of Rice Husk Fuel for Continuous Electricity Generation; Rice Husk Price; Fuel Economics; Quantity and Price of Fuel; Availability of Rice Husk in the Adjoining Areas of 10 mw Plant at Bankati; Observations; Recommendations; Recommended Policy Frame Work for Channelising use of Rice Husk for Improving Living Standard of People; Exercise
