

# Contents

## MATHEMATICS

1.	<b>Basic Concepts</b>	
	Some Formulae, Elementary Algebra, Exponents or Theory of Indices, Number System, Sets and Sub Sets, Some More Sets.	
2.	<b>Analytical Geometry of Two Dimensions</b>	
	Locus of a Point, Rectangular Hyperbola, The Parabola, Exercise, The Equation of a Circle, Illustrations	
3.	<b>Linear and Quadratic Equations</b>	6
	Linear Equation — One Variable, Illustrations, Solve Yourself, Quadratic Equations, Exercise	
4.	<b>Ratio Proportion, Variation and Growth</b>	10
	Illustrations, Exercise, Growth—Simple and Compound, Illustration	
5.	<b>Logarithms</b>	12
	Illustrations, Exercise	
6.	<b>Elements of Trigonometry</b>	13
	Illustrations	
7.	<b>Arithmetic and Geometric Progression</b>	15
	Arithmetic Progression, Illustrations, Geometric Progression (G.P), Illustrations, Exercise, The Sigma ( $\Sigma$ ) Notation and Use of Subscripts, Illustrations	
8.	<b>Functions and their Graphic Representation</b>	18
	Introduction, Function, Illustrations, Graph of a Function, Exercise	
9.	<b>Limits and Continuity</b>	20
	Illustration, Continuity of a Function, Illustrations, Exercise	
10.	<b>Derivatives</b>	22
	Illustrations, Exercise, Differentiation of Logarithmic and Exponential Functions, Illustrations, Exercise	
11.	<b>Application of Differentiation in Economic Theory</b>	25
	Revenue Function, Application of Mathematics in Economic Theory— Illustrations on Elasticity of Demand and Elasticity of Supply, Exercise, Cost Functions, Exercise	
12.	<b>First and Higher Order Derivatives and their Uses— Maxima and Minima, Economic Applications</b>	29
	Effect of Taxation and Subsidy on Monopoly, Illustrations on Maxima and Minima, Illustrations on Perfect Competition and Monopoly Market Situations, Exercise	
13.	<b>Partial Derivatives</b>	31
	Homogeneous Functions, Illustrations, Exercise	
14.	<b>Differential and Total Derivatives</b>	35
	Illustrations, Extreme Values when U is a Function of More than One Variable, Lagrange's Multiplier, Illustrations, Exercise	
15.	<b>Integration</b>	39
	Illustrations, Exercise, Application of Integration in Economics, Consumer's Surplus, Producer's Surplus, A Problem of Durable Capital Goods, Illustrations, Exercise	
16.	<b>Determinants and Matrices</b>	46
	Illustrations, Illustrations, Exercise, Algebra of Matrices or Operations with Matrices, Illustrations, Exercise, Some Definitions and Operations, Input-Output Analysis, Some Applications	
17.	<b>Economic Models</b>	53
18.	<b>Linear Programming</b>	54
	Graphic Method, The Simplex Method, Exercise	
19.	<b>Game Theory</b>	57

20.	<b>Input-Output Analysis</b>	59
	Dynamic Input-output Model, Illustrations	
21.	<b>Differential Equations</b>	60
	Illustrations, Exercise	
22.	<b>Difference Equations</b>	63
	Illustrations, Exercise	

## STATISTICS

1.	<b>Statistics (Introduction)</b>	1.1
	Introduction, Exercise	
2.	<b>Frequency Distribution</b>	2.16
	Illustrations, Exercise	
3.	<b>Presentation of Data</b>	3.34
	Illustration, Illustration, Exercise	
4.	<b>Collection of Data</b>	4.80
	Exercise	
5.	<b>Measures of Central Tendency</b>	5.99-
	Illustrations, Illustrations, Illustrations, Exercise	
6.	<b>Measures of Dispersion, Skewness, Kurtosis and Moments</b>	6.161-
	Illustrations, Skewness, Illustrations, Moments, Illustrations, Ginn's Mean Difference, Exercise, Dispersion and Skewness	
7.	<b>Correlation</b>	7.236-
	Illustrations, Exercise, Correlation	
8.	<b>Regression</b>	8.281-
	Not needed for Elementary Students, Illustrations, For Advanced, Statistics Students, Illustration, Exercise, Regression	
9.	<b>Association of Attributes</b>	9.321-
	Illustrations, Exercise, Association of Attributes	
10.	<b>Index Number</b>	10.351-1
	Illustrations, Exercise, Index Number	
11.	<b>Time Series Analysis</b>	11.395-1
	Illustrations, Exercise, Analysis of Time Series	
12.	<b>Interpolation and Extrapolation</b>	12.433-1
	Illustrations, Exercise, Interpolation and Extrapolation	
13.	<b>Probability—Theory</b>	13.461-1
	Illustrations, Expectation of Product of Random Variable, Formulae, Exercise, Important Formulae	
14.	<b>Discrete Probability Distributions</b>	14.526-1
	Illustration on Poisson's Distribution, Exercise, Important Formulae	
15.	<b>Normal Distribution</b>	15.563-1
	Illustrations, Exercise, Important Formulae	
16.	<b>Sampling Distribution</b>	16.592-1
	F—Test, Fisher's Z test, Exercise	
17.	<b>Estimation</b>	17.625-1
	Exercise	
18.	<b>Hypothesis Testing</b>	18.641-1
	Illustrations, Test of Significance for the Difference of Means, t-test (Small sample test), Exercise	
19.	<b><math>\chi^2</math> Distribution (Test for Goodness of fit)</b>	19.688-1
	Illustrations, Exercise	
20.	<b>Analysis of Variance</b>	20.709-2
	Illustrations, Exercise	
21.	<b>Multiple and Partial Correlation</b>	21.733-2
	Illustrations, Multiple Regression, Important Formulae, Exercise	
22.	<b>Law of Large Numbers Neyman and Pearson Lemma and Central Limit Theorem</b>	22.755-2
23.	<b>Decision Theory</b>	23.765-2
	Tables
