

Contents

MATHEMATICS

- 1. Basic Concepts**
Some Formulae, Elementary Algebra, Exponents or Theory of Indices, Number System, Sets and Sub Sets, Some More Sets.
- 2. Analytical Geometry of Two Dimensions** 2
Locus of a Point, Rectangular Hyperbola, The Parabola, Exercise, The Equation of a Circle, Illustrations
- 3. Linear and Quadratic Equations** 63
Linear Equation — One Variable, Illustrations, Solve Yourself, Quadratic Equations, Exercise
- 4. Ratio Proportion, Variation and Growth** 102
Illustrations, Exercise, Growth—Simple and Compound, Illustration
- 5. Logarithms** 122
Illustrations, Exercise
- 6. Elements of Trigonometry** 136
Illustrations
- 7. Arithmetic and Geometric Progression** 151
Arithmetic Progression, Illustrations, Geometric Progression (G.P), Illustrations, Exercise, The Sigma (Σ) Notation and Use of Subscripts, Illustrations
- 8. Functions and their Graphic Representation** 183
Introduction, Function, Illustrations, Graph of a Function, Exercise
- 9. Limits and Continuity** 203
Illustration, Continuity of a Function, Illustrations, Exercise
- 10. Derivatives** 223
Illustrations, Exercise, Differentiation of Logarithmic and Exponential Functions, Illustrations, Exercise

11. Application of Differentiation in Economic Theory	25
Revenue Function, Application of Mathematics in Economic Theory—Illustrations on Elasticity of Demand and Elasticity of Supply, Exercise, Cost Functions, Exercise	
12. First and Higher Order Derivatives and their Uses— Maxima and Minima, Economic Applications	29
Effect of Taxation and Subsidy on Monopoly, Illustrations on Maxima and Minima, Illustrations on Perfect Competition and Monopoly Market Situations, Exercise	
13. Partial Derivatives	32
Homogeneous Functions, Illustrations, Exercise	
14. Differential and Total Derivatives	35
Illustrations, Extreme Values when U is a Function of More than One Variable, Lagrange's Multiplier, Illustrations, Exercise	
15. Integration	39
Illustrations, Exercise, Application of Integration in Economics, Consumer's Surplus, Producer's Surplus, A Problem of Durable Capital Goods, Illustrations, Exercise	
16. Determinants and Matrices	46
Illustrations, Illustrations, Exercise, Algebra of Matrices or Operations with Matrices, Illustrations, Exercise, Some Definitions and Operations, Input-Output Analysis, Some Applications	
17. Economic Models	53
18. Linear Programming	54
Graphic Method, The Simplex Method, Exercise	
19. Game Theory	57
20. Input-Output Analysis	59
Dynamic Input-output Model, Illustrations	
21. Differential Equations	60
Illustrations, Exercise	
22. Difference Equations	63
Illustrations, Exercise
